**GAIN VALUABLE EXPOSURE  
TO ENVIRONMENTAL PROFESSIONALS, INDUSTRY REPRESENTATIVES,  
GOVERNMENT PARTNERS AND RESEARCHERS**

The 2007 Environmental & Subsurface Science Symposium, featuring Subsurface Biotechnology and Bioremediation, presented by the Inland Northwest Research Alliance, Utah State University, Department of Biological and Irrigation Engineering and Montana State University, Center for Biofilm Engineering is offering a progressive marketing opportunity to companies and organizations to gain valuable exposure to environmental professionals, industry representatives, government partners and researchers throughout the Inland Northwest.

This year's event – held July 25 - 27, 2007 at the Eccles Conference Center, Logan, Utah will highlight research projects from eight affiliate universities and feature a keynote address by Dr. William Schlesinger, Ph.D., Dean of the Nicholas School of The Environment and Earth Sciences, Duke University; Dr. Robert Hinchee, Ph.D., P.E., Integrated Science and Technology, Inc.; and Dr. Kirby Donnelly, Ph.D., Professor and Head of the Environmental and Occupational Health Department at the Texas A&M University System Health Science Center School of Rural Public Health.

The Inland Northwest Research Alliance is offering sponsorship and exhibitor opportunities that provide a unique avenue to showcase your business or organization. Your support will assist the research efforts that will be highlighted during this year's Environmental & Subsurface Science Symposium.

Please read through the enclosed materials and submit the appropriate forms according to your sponsorship interest or call me for further information at 208-524-4800. Together we can create a package that will give your business or organization maximum exposure.

Thank you for considering a partnership with the 2007 Environmental & Subsurface Science Symposium, featuring Subsurface Biotechnology and Bioremediation and an investment in tomorrow's research.

Sincerely,

Fred Sica  
Director of Business & Research Development
